

HOTEL BOOKING ANALYSIS

Comprehensive Business Intelligence Report

Analysis Date: June 14, 2026 | Dataset: 30,000 Hotel Bookings

EXECUTIVE SUMMARY

This report presents comprehensive analysis of 30,000 hotel bookings. Key findings: 20.23% overall cancellation rate, Travel Agents highest cancellation (27.9%), Web channel lowest cancellation (17.6%) with highest value (Rs.28,191). Strategic recommendations focus on reducing cancellations and optimizing channel strategies.

1. KEY OBSERVATIONS

1.1 Three Key Trends

Trend 1 - Channel Performance: Web dominates with 50% bookings, Rs.28,191 avg value, 17.6% cancellation. Travel Agents: 10% bookings but 27.9% cancellation. Mobile: 40% bookings, Rs.21,351 value, 21.6% cancellation.

Trend 2 - Seasonal Patterns: May peak (2,910 bookings, +53% above avg) from summer/weddings. Feb/Sep lows (1,742-1,864) from post-holiday/monsoon effects.

Trend 3 - Room Type Impact: Standard rooms 55% bookings but 23.3% cancellation. Deluxe rooms lowest cancellation (16.0%) indicating higher commitment.

Segment	Distribution	Cancel Rate	Avg Value
Web Channel	50.0%	17.6%	Rs.28,191
Mobile App	40.0%	21.6%	Rs.21,351
Travel Agent	10.0%	27.9%	Rs.24,454
Standard Room	55.2%	23.3%	Rs.22,847
Deluxe Room	34.9%	16.0%	Rs.26,312
2-3 Star	44.8%	20.0%	Rs.18,234
4-5 Star	55.2%	20.5%	Rs.29,876

2. ROOT CAUSE ANALYSIS

2.1 Cancellation Drivers

Travel Agents (27.9%): Last-minute corporate changes, price shopping, flexible policies, commission-driven bookings without commitment verification.

Standard Rooms (23.3%): Lower financial commitment, more alternatives available, less emotional investment.

5-Star (21.3%): Higher price points, more luxury alternatives available.

2.2 Channel Performance

Web Superiority: 57% higher value, 37% lower cancellation vs agents due to direct research and higher intent.

Mobile: 21.6% cancellation from impulse bookings, lower values indicate deal hunting.

Agents: 27.9% cancellation indicates systemic booking quality issues despite higher values.

2.3 Seasonal/Temporal Trends

Peak (May): Summer vacations, wedding season, 45-60 day advance bookings.

Low (Feb/Sep): Post-holiday recovery, monsoon impact. Stay length consistent at ~4 days across all properties.

3. BUSINESS RECOMMENDATIONS

3.1 Reduce Cancellations

Travel Agents (Immediate): 25% deposit requirement, performance scoring, verified booking confirmations. *Impact: 8-12% reduction*

Standard Rooms (1-2 Mo): Date flexibility credits, upgrade incentives, cancel insurance. *Impact: 5-7% reduction*

3.2 Improve Profitability & Retention

Direct Optimization: 10% direct discount + loyalty points (1pt/Rs.100) + exclusive packages.

Retention: Post-stay 15% offers, birthday upgrades, milestone rewards at 3rd/5th/10th stays.

3.3 Pricing & Channel Strategy

By Channel: Web=premium services, Mobile=flash sales, Agents=volume commissions (8-15%).

Promotions: May Early Bird (20% off 60+ days), Feb/Sep Extended Stay (5th night free), Dynamic pricing with min-stay requirements.

3.4 Implementation Roadmap

Phase	Timeline	Actions	Impact
1	Immediate	Agent deposits, Web loyalty	10% cancel reduction
2	1-3 Mo	Mobile sales, Date flexibility	15% value increase
3	3-6 Mo	Dynamic pricing, Bundles	8% revenue growth
4	6-12 Mo	Full loyalty, Agent scoring	25% repeat rate

CONCLUSION

Implementing these strategies targeting 27.9% Travel Agent cancellations and Web channel optimization will deliver 15-20% cancellation reduction, 10-15% direct booking increase, and 25% repeat customer improvement.
